

Commercial Profile
Austin, Texas USA

About Us

GCM is an international company headquartered in Valencia, Spain, specializing in the sale and servicing of internal combustion engine and turbine driven power generators

Founded in 2009 as a sales and technical service company, GCM has since offered high quality refurbished equipment from leading brands and a wide range of technical services, with an expansive international presence, reaching now over 30 countries.

In 2024, GCM opened a strategic branch in Austin, Texas to support company growth across the booming USA market. The company keeps multiple talent centers and partnerships to support its growing activity.

GCM also manages worldwide equipment shipping with vast expertise in logistics and transportation processes.

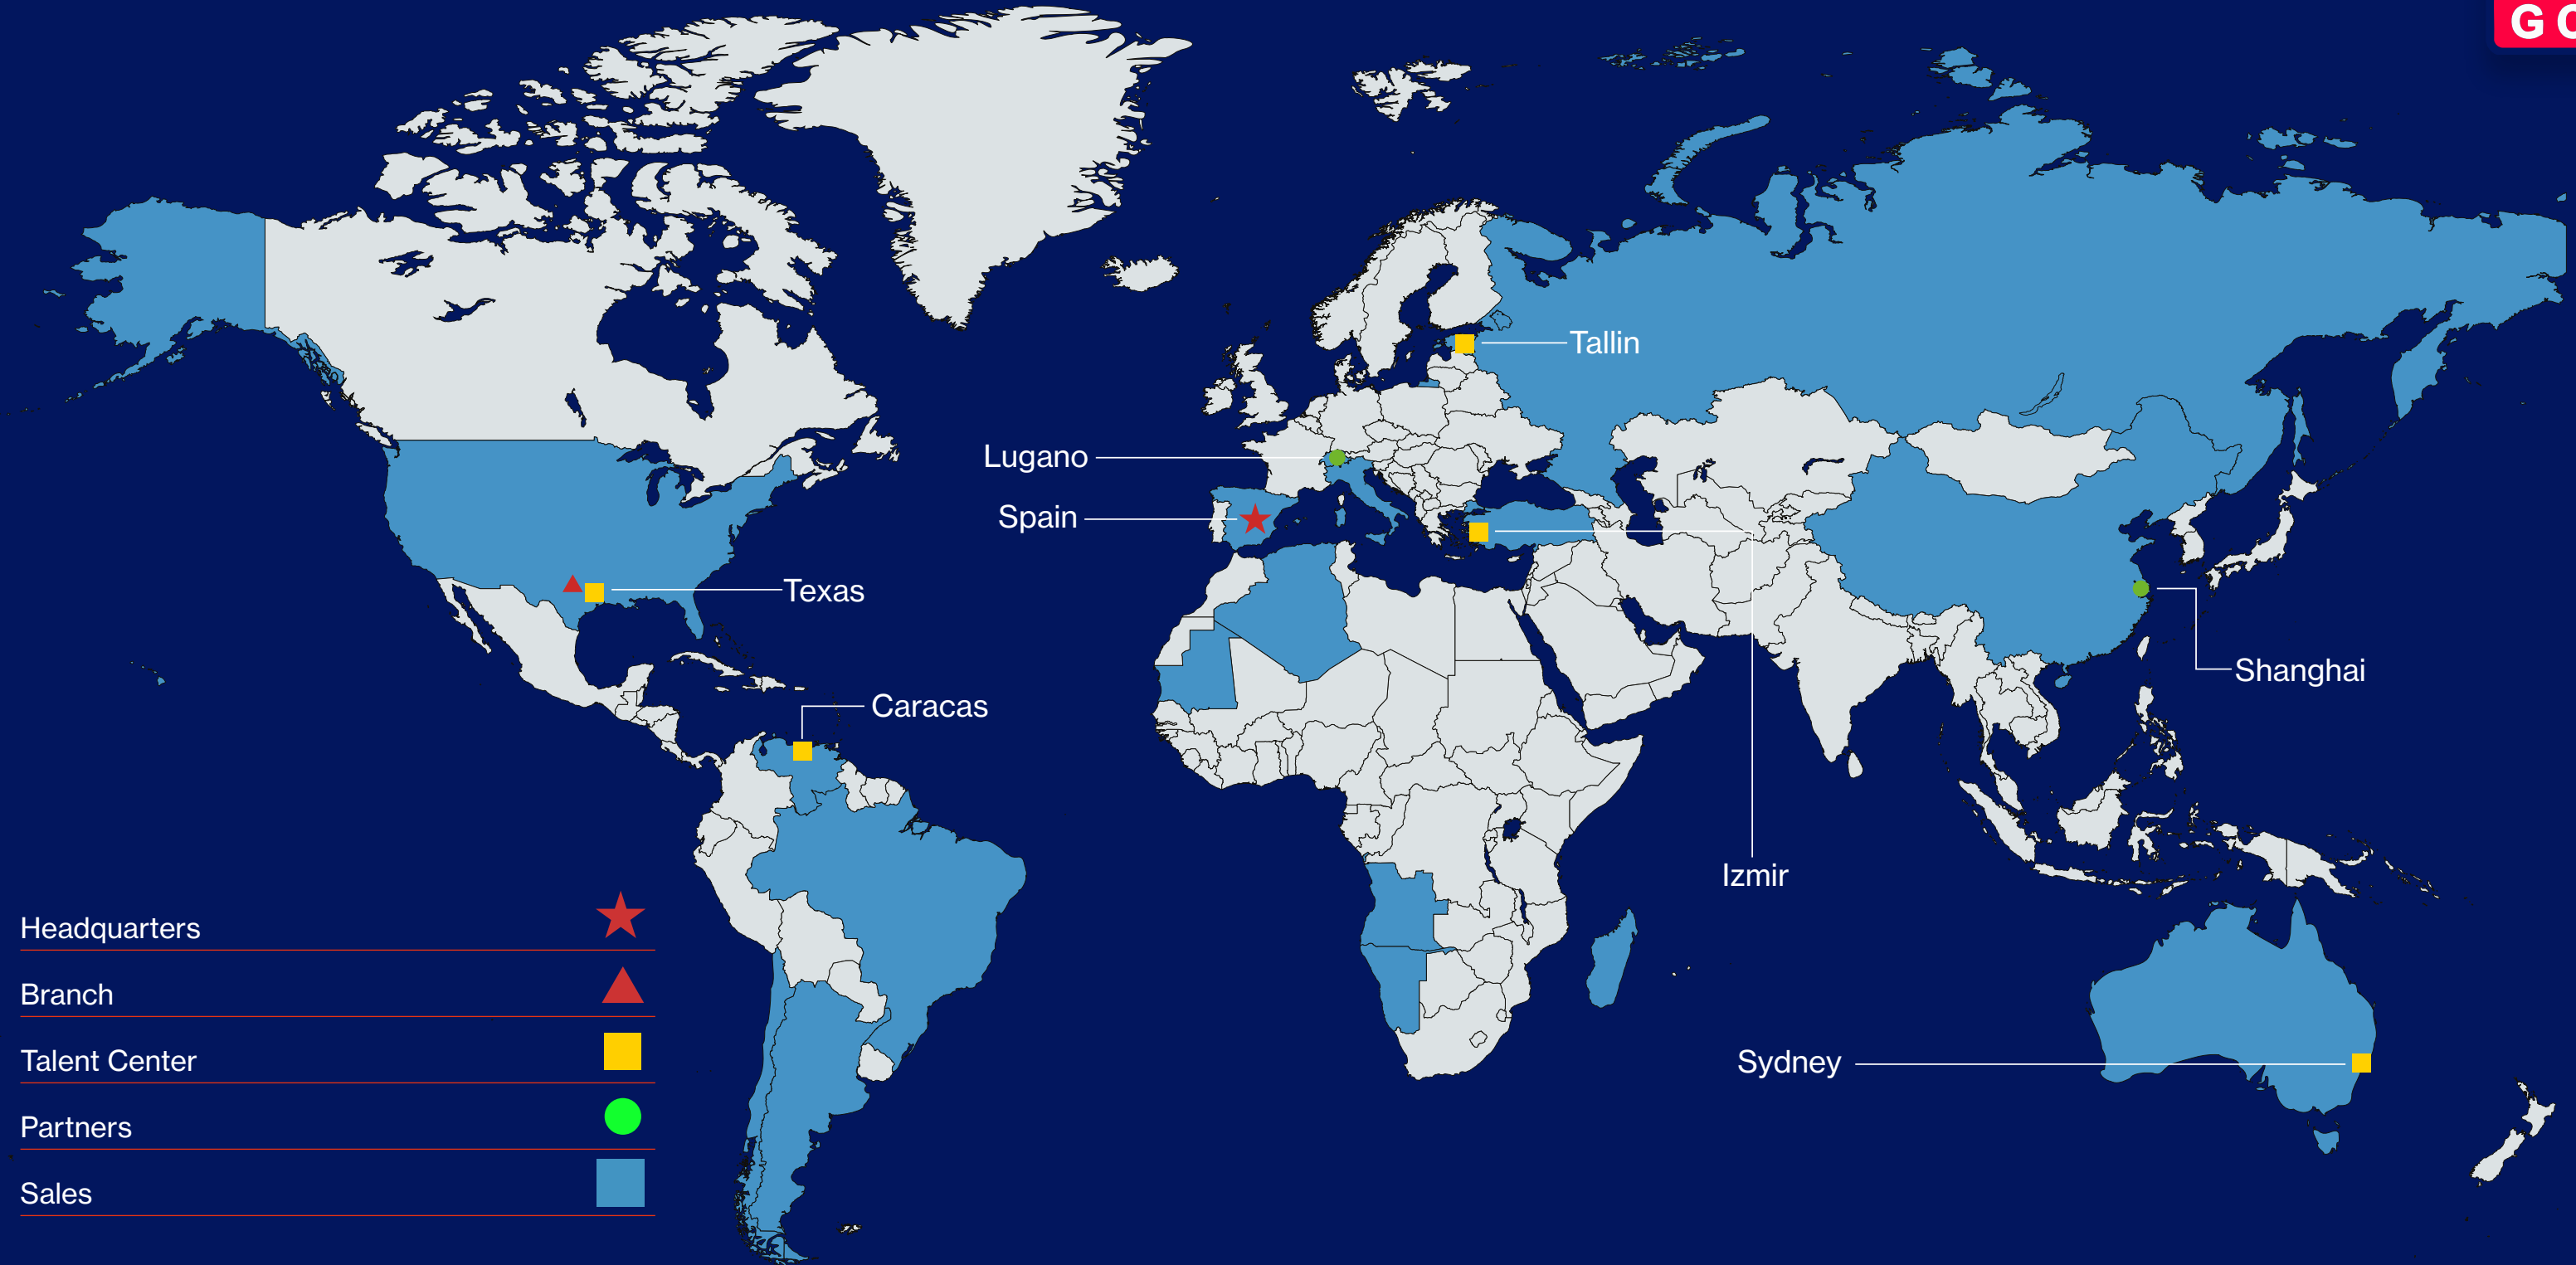

Mission

Becoming the preferred supplier for our clients by delivering reliable power solutions, managing commercial risk, and creating value beyond expectations
